

SHOESTRING

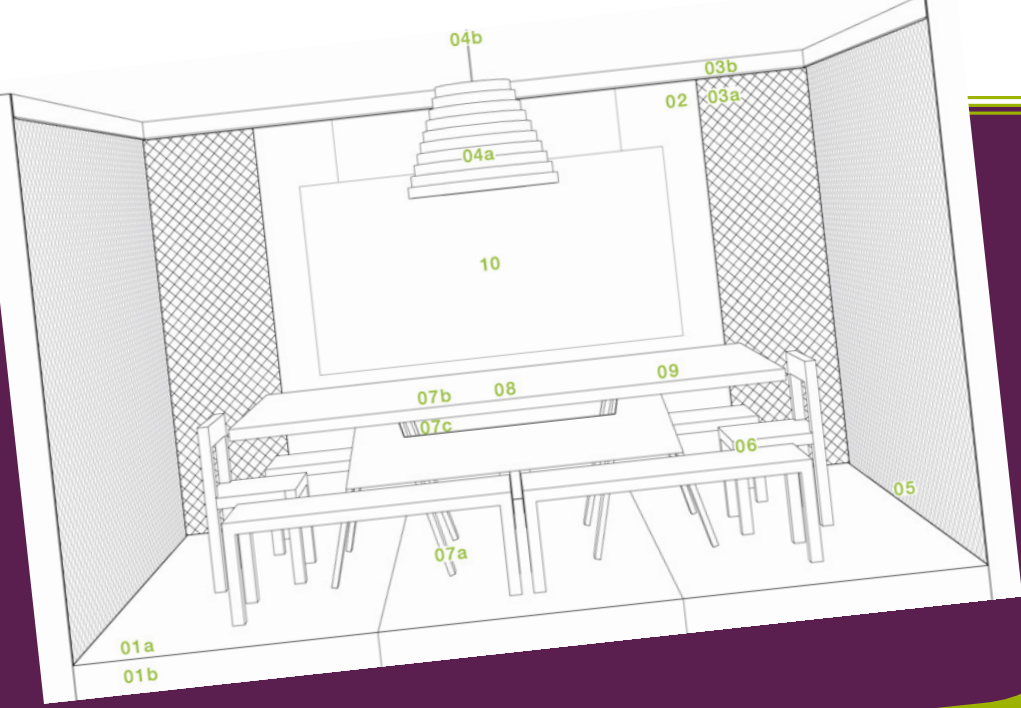

LUXE

“WE WANTED our space to be fresh, modern and clean...and to represent the new thought in luxury design that values sustainability and affordability. Our goal was for people to admire our work for the aesthetic value first, and then come to realize that it was all done by hand. We took this on as a personal challenge to demonstrate that you can have high design on a shoe-string budget if you are creative and unafraid to roll up your sleeves and get your hands dirty. 90% of our table was sourced from Home Depot!”
